

**Kodak**

*Prostar* Archive Processor

## Safeguard your future with archive processing today.

Committing your source document images and computer-output digital documents to microfilm assures access to important information for decades—even centuries. Proper processing is critical to protecting that access. Make certain you achieve true archival keeping with a new *Kodak Prostar* Archive Processor, now easier to use and more ecologically friendly than ever before. It is designed for room-light operation and is quiet and compact.

**START WITH AUTOMATIC THREADING.  
FINISH WITH ARCHIVAL QUALITY.**

With the Archive Processor, you don't need a film specialist to get predictable, high-quality results. It incorporates the latest in digital monitors and controls, rapid-recovery, energy-saving stand-by cycles, and an environment-friendly anti-siphon water supply. The Archive

Processor provides precisely controlled film processing with minimal operator training or experience. Simply attach film to the self-threader and insert it into the drive rollers. In less than a minute, dry, processed film begins exiting the machine. Upon completion of a roll, the Archive Processor automatically cycles into a money-saving energy-conservation mode.

**TABLETOP PROCESSING THAT FITS WHERE YOU WANT IT.**

Its room-light loading and tabletop size permit you to use the Archive Processor virtually anywhere. Plus, there's no mixing, no mess, and no fuss, because *Kodak Prostar Plus* Chemicals come premixed in disposable plastic containers and are ready to use. You gain the added security and control of in-house processing without the expense of a darkroom. For added convenience, parts that require periodic replacement, such as air filters, can be replaced in seconds by an operator.

# Kodak Prostar Archive Processor

The *Kodak Prostar* Archive Processor is ruggedly built for long life and reliability and is backed by warranties and service from Kodak.

Just as important is the integrity of your microfilm. When properly operated, the *Kodak Prostar* Archive Processor meets all applicable international standards for archival quality. Because film is available in less than a minute and you need not leave your office, the security of your private records and confidential information is safeguarded.

Plus, when you use *Kodak* Microfilm, you're protected by the *Kodak* Disaster Recovery Program at no additional charge.

## SPECIFICATIONS :

**Speed:** 10 ft. (3 m)/min

### Water Requirements:

*Temperature:* 96° F + /-2°  
(36.5°C +/- 1.5°)

*Flow rate:* 0.5 gal/.min  
(1.9L/min)

*Drain rate:* 6.0 gal./min  
(22.7 L/min)

(Hoses for water supply and drain are included)

### Electrical Requirements:

120 V AC 60 Hz (U.L. marked for U.S. and Canada)  
(50 Hz available with simple field modification)

### Electrical Use:

*Stand-by mode:* 100-200 Watts

*Operational mode:* 600-1000 Watts

*Warm-up mode:* 1400 Watts

### Chemical Capacity:

44 fl. oz. (1.3 L) each of

*Kodak Prostar* Plus Developer and Fixer

Without replenishment will process up to 3,000 feet (900 m) of 16 mm microfilm.

With replenishment will process up to 18,000 feet (5,000 m) of 16 mm microfilm.

### Physical Dimensions:

*Height:* 31 in. (79 cm)

36 in. (91 cm) when open

*Depth:* 16 in. (41 cm)

24 in. (61 cm) when open

*Length:* 39 in. (99 cm)

*Weight:* 115 lb. (52 kg) empty

140 lb. (64 kg) operational

### Accessories:

*Kodak Prostar* Chemical Replenisher Unit

(CAT 809 0755)

*Kodak Prostar* Cabinet

(CAT 144 4256)

*Kodak Prostar* Cabinet Sink

(CAT 144 4413)

*Kodak Prostar* Cassette Adapter

(CAT 131 6165)

*Kodak* Thermostatic Mixing Valve

(CAT 142 3698)

*Kodak Prostar* 16 mm Self-Threader

(CAT 199 0993)

*Kodak Prostar* 16 mm Dual

Strand Self-Threader

(CAT 146 5194)

*Kodak Prostar* 35 mm

Self-Threader (CAT 199 1009)

For manufacturing of imaging equipment.
